

Clicker 7 Installation Instructions

Registration	1
Install to a standalone computer	1
Install to computers on a network	2
Managing licenses	2
Contact Support.....	2

Registration

Ensure your Clicker 7 serial number is registered at activate.cricksoft.com.

This will enable us to locate your serial number if it becomes lost in future, and allow you to manage your licenses.

Install to a standalone computer

1. Insert the Clicker 7 DVD into your computer and run **Clicker 7 Installer**.
Alternatively, download the latest version from:
download.cricksoft.com/clicker7/clicker7.dmg
2. Choose **Install Clicker on this computer** and click **Install**.
3. When prompted, provide your **serial number** (back of the DVD case).
4. Follow the on-screen instructions.

Install to computers on a network

1. Create a folder named **Crick** on the server:
 - Make the **Crick** folder a Share Point.
 - Ensure the **Everyone** group has **Read/Write** access to the **Crick** folder.
2. Insert the Clicker 7 DVD into your client computer and run **Clicker 7 Installer**.
Alternatively, download the latest version from:
download.cricksoft.com/clicker7/clicker7.dmg
3. Choose **Install to computers on the network** and click **Install**.
4. When prompted, provide your **serial number** (back of the DVD case).
5. When prompted, browse to **Crick** Share Point from Step 1 for the **Network install path** and **Shared Files path**.
6. When the network setup finishes, it generates a **Clicker 7 Client.dmg** in the **Crick** Share Point.
You can then do one of the following:
 - Double-click the **Clicker 7 Client.dmg** and run the **Clicker 7 Installer.pkg** on each client.
 - Deploy the **Clicker 7 Installer.pkg** via Apple Remote Desktop.
(Please visit the Apple website for information on deploying software via Apple Remote Desktop.)

Managing licenses

To move a license from one computer to another, visit the **License Management** page at:
activate.cricksoft.com
